

TL46 SERIES

The new digital contrast sensor line of the **TL46** series is characterised by excellent performances in terms of resolution, definition and precision of the light spot emitted by RGB LEDs, low response time and high switching speed. The sensor, developed in a sturdy metal housing with standard fixing, is available in 3 different versions able to better satisfy all applications offering avantgarde technology at the best price/performance ratio. The **TL46-W** basic version has only one set push-button, 2 LEDs indicating respectively the output status and sensor acquisition condition. The performances and use ease have been optimised and offered at a competitive price. The **TL46-WL** standard version has set 3 push-buttons, 4 LEDs signalling the output status, sensor acquisition condition, delay output activation and push-button activation. A bargraph is also available for manual setting of the threshold to detect particularly difficult contrasts. The standard version supplies excellent performances in general at a 20 kHz switching frequency. The **TL46-WLF** enhanced version presents a 4-digit display for the setting of the most advanced functions, such as dynamic acquisition of the contrast mark. The sensor reaches the maximum market performances at 30 kHz switching frequency. Accessory lenses with 9 - 40 mm focal distance are available for all versions, as well as a high-resolution focussing lens and a PMMA plastic patent-covered lens particularly suitable to food applications with standard 9 mm focal distance.

HIGHLIGHTS

- Wide-spectrum RGB LED emission
- 3 different versions: basic, standard and enhanced
- Automatic, manual and dynamic setting
- 15, 20 or 30 kHz switching frequency
- NPN/PNP and analogue outputs
- Standard fixing, M12 connector rotatable on 5 positions

APPLICATIONS

Ceramics

Beverage & Bottling

Packaging lines

## SETTING

The switching threshold is set pressing twice the SET push-button; the first for the mark the second for the background.

The threshold level can be set manually, in the TL46-WL/WLF version, pressing the '+' and '-' push-buttons which increase or reduce the threshold as visualised on the bargraph or display.

The dynamic setting, present in the TL46-WLF version, detects the moving mark by simply keeping the SET push-button pressed, or activating the Remote/Dyn input.

## DIMENSIONS

## INDICATORS AND PUSH-BUTTONS

TL46-W  
BASE

TL46-WL  
STANDARD

TL46-WLF  
ENHANCED

- A** yellow OUTPUT LED
- B** green READY LED
- C** orange DELAY LED
- D** orange KEYLOCK LED
- E** Bargraph

- F** +/- push-buttons
- G** SET push-button
- H** Display
- I** MARK push-button
- L** BKGD push-button

## CONNECTIONS

M12 CONNECTOR

Version	pin 1	pin 2	pin 3	pin 4	pin 5 *
	(brown)	(white)	(blue)	(black)	(grigio)
TL46-W Base	+10...30Vdc	1...5.5Vdc output	0Vdc	NPN/PNP output	Delay
TL46-WL Std.	+10...30Vdc	1...5.5Vdc output	0Vdc	NPN/PNP output	Remote
TL46-WLF Enh.	+10...30Vdc	Dark/Light Dyn.	0Vdc	NPN/PNP output	Remote/Dyn.

\* A M12 4-pole connector can be used if the PIN5 function is not necessary.

**TECHNICAL DATA**

**VERTICAL SPOT**

**HORIZONTAL SPOT**

Horizontal spot is present in the TL46 models with final '-L' suffix

**TECHNICAL NOTES**

<sup>1</sup> Limit values

<sup>2</sup> Average life of 100.000 h with TA = +25 °C

<sup>3</sup> Connector block rotatable on 5 positions

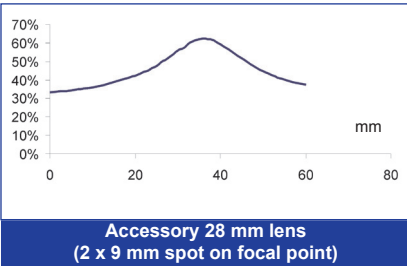

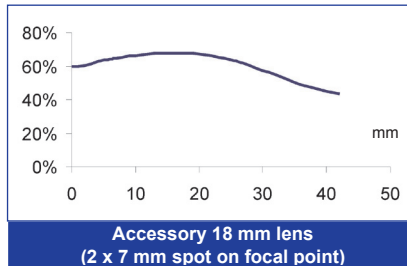

<sup>4</sup> A - reverse polarity protection

B - overload and short-circuit protection
